Skin Lesion Classification on FPGA

by Lewis Turner

Research Report

Submitted in partial fulfilment for the degree of
BSc (Hons) Computer Science

Supervised by Dr. Rob Stewart

Heriot-Watt University
School of Mathematical and Computer Sciences

22nd October 2026

Statement on Generative AI Use:

EDIT this statement to indicate what use you made of Generative AI for your project work and in preparation of this document. If your project is about developing or experimenting with Generative AI, you still need to indicate your Generative AI use beyond the developments and experiments. If you have not used Generative AI, indicate it explicitly.

ME

• Google Gemini 3.8 Flash (Extended Thinking) to assist in searching for relevant research papers.

• Google Gemini 4.0 Argon (thinking: Low - High) to assist setting up FPGA for use over Wifi.

By signing this form:

• I declare that the work I have submitted for this assessment is my own original work. I have not presented the ideas, words, data, code, designs, analyses, or other intellectual contributions of another person or system as my own.

• My submission is expressed in my own words except where the work of others has been appropriately acknowledged, cited, and referenced. All sources used in the preparation of this assessment, including books, journal articles, websites, software tools, and Generative AI tools, have been properly acknowledged.

• Where Generative AI tools have been used, I have complied with the course's stated policies regarding Generative AI use. I have clearly and accurately disclosed in the above statement box all uses of Generative AI in the assessment, including the specific tools used, the purpose for which they were used, and the extent to which any generated content influenced the final submission.

(form continues on next page)

(form continued from previous page)

• I understand that I remain fully responsible for the content, accuracy, integrity, and originality of my submission, regardless of any assistance received from Generative AI or other tools.

• I confirm that I have read, understood and followed the University's Regulations on academic misconduct as published on the University's website, and that I am aware of the penalties that I will face should I not adhere to the University Regulations.

• I confirm that I have read, understood and avoided the different types of plagiarism explained in the University guidance on Academic Integrity and Plagiarism.

Abstract

PROBLEM/GAP I'VE IDENTIFIED (RESEARCH QUESTION). I used _____ methods to compress _____ skin lesion classification model onto AMD FPGA. If deployed model small enough & but performance not good then maybe add module to pre-process input image. RESULTS I'VE GATHERED.
